

COHASSET GARDEN CLUB 2019

Civic Projects

Our collective commitment to Civic Projects is fulfilled individually by every member of the Club with the exception of the Honorary and Sustaining members. Duties consist of planting and maintaining the Virginia W. Knowles Garden at the Cohasset Historical Museums, the Knowles water trough at the intersection of Beach Street and Atlantic Avenue, the entrance garden at the Lightkeepers' Residence on Government Island, and the pollinator garden at the Osgood Elementary School.

Every year the Civic Projects Chairman organizes a schedule of captains and workers for each month at each location. Both captains and workers are required to spend a minimum of one hour each week working.

If a member's assignment is inconvenient or impossible for her to fulfill, she must trade times with a worker from another month and notify both captains.

If a member repeatedly fails to show up on her appointed day, she will either be asked to make up her time on another day or her name will be passed along to the next month's captain who will then ask her to work during that month.

Reminders for Knowles and Lightkeepers' Residence Garden Workers

- Keep the grass cut.
- Water! When watering by hand, always use the wand and water at the base of plants. When using the sprinkler, DO NOT water the buildings.
- Weed!
- Remove dead blooms.
